

Generalized Functions, Convergence Structures, and Their Applications

By -

Springer. Paperback. Book Condition: New. Paperback. 464 pages. Dimensions: 9.6in. x 6.7in. x 1.1in. This Proceedings consists of a collection of papers presented at the International Conference Generalized functions, convergence structures and their applications held from June 23-27, 1987 in Dubrovnik, Yugoslavia (GFC-87): 71 participants from 21 countries from all over the world took part in the Conference. Proceedings reflect the work of the Conference. Plenary lectures of J. Burzyk, J. F. Colombeau, W. Gähler, H. Keiter, H. Komatsu, B. Stankovic, H. G. Tillman, V. S. Vladimirov provide an up-to-date account of the current state of the subject. All these lectures, except H. G. Tillman's, are published in this volume. The published communications give the contemporary problems and achievements in the theory of generalized functions, in the theory of convergence structures and in their applications, specially in the theory of partial differential equations and in the mathematical physics. New approaches to the theory of generalized functions are presented, motivated by concrete problems of applications. The presence of articles of experts in mathematical physics contributed to this aim. At the end of the volume one can find presented open problems which also point to further course of development in the theory...

Reviews

These types of ebook is the greatest book available. Better than never, though I am quite late in start reading this one. I am just very happy to explain how here is the very best pdf I actually have read through inside my individual daily life and can be the greatest book for ever.

-- **Camryn Runolfsson**

A top quality book along with the typeface employed was interesting to learn. It is one of the most amazing books we have studied. I discovered this pdf from my iPad and dad recommended this book to learn.
