

## Physiology Coloring Workbook (Coloring Workbooks)

By Axen, Kenneth

Princeton Review, U.S.A., 1997. Soft cover. Book Condition: New. 1st Edition. 4to - over 9¾ - 12" tall. Synopsis: Physiology Coloring Workbook is a breakthrough approach to learning and remembering the body's processes. Written and illustrated by experts who are both research scientists and teachers, it features 250 striking, original illustrations that will give students a clear and enduring understanding of physiology. Learning interactively, through coloring, thoroughly fixes physiological concepts in the mind and takes less time than memorizing from textbooks. Physiological processes are fully explained, and complex subjects are approached through the gradual introduction of simple drawings. The authors employ a logical and consistent use of color to convey information; for example, arterial blood is always red, whereas venous blood is blue, and capillary blood is violet. Each lesson includes clearly displayed labels and specific coloring instructions. This book is an invaluable and lasting resource for students in disciplines including anatomy and physiology, biology, nursing, physical therapy and rehabilitation, medical technology, nutrition, physical education, allied health and health sciences.
