Reviews

It is just one of the best publications. This can be for anyone who states that there was not a well worth reading through. Once you begin to read the book, it is extremely difficult to leave it before concluding.

POPULAR POLITICAL SUPPORT IN URBAN CHINA

Stanford University Press. Paperback. Book Condition: new. BRAND NEW, Popular Political Support in Urban China, Jie Chen, Has the current political system in the People's Republic of China lost its legitimacy in the eyes of the Chinese public? On the basis of three carefully drawn surveys of Beijing residents between 1995 and 1999, the author finds that diffuse support for the current political system - based on attitudes toward institutions and values - remains strong, at least among city-dwellers, though it is gradually declining. Specific support for current political authorities, as measured by evaluations of their performance in major policy domains, is much weaker, with many citizens evaluating the authorities' performance as mediocre. In analyzing the longitudinal data presented here, the author finds that the same set of key sociodemographic attributes and sociopolitical orientations variably influence citizens' attitudes toward the political system and their evaluations of leaders' performance. Further, the study shows that citizens' attitudes toward the system, on the one hand, and their evaluation of incumbents' performance on the other, have different impacts on forms of political participation, such as voting and contacting authorities.
